

COMPANY PROFILE & PREQUALIFICATION DOCUMENTS

Design

Construction

Consulting

Design

Full solutions for different themes, purposes and styles

Our design department works with a highly experienced and motivated staff to transform our clients idea in a most efficient way to high-quality design
 As LeoCore landscape comes from construction background it's designs signature was practicality, as we believe that creative designs must be possible to implement however extreme it is
 And as we agree that standards and the well experimented methods must be applied yet we understand that each project has its own character depending on many aspects from site location and conditions , theme, and client requirements

Construction

Attending to details and the close supervision matching the design aspect with engineering standards is the main essence shaping our work

Every project comes with unique condition from standards, to official requirements and client vision and needs .

We like to study the aspect of special projects carefully and share our experiences to reach our client's satisfaction

Hotels and resort

Maximum comfort and luxury must be the main title.

Budget and quality do not contradict

Residential compounds

Creating a warm and colorful environment within the boundaries of your home or the recreational common area is an experience that we gained through many projects
